PREFACE

This publication is based primarily on surveys conducted and computed by the Higher Education Section of the Dominion Bureau of Statistics in December of 1968. These surveys were designed to meet the requirements of the Professional and Technical Occupations Section of the Department of Manpower and Immigration which is responsible for changes and additions which have been made in order to update the information.

It is designed to be used by manpower counsellors, educators, and employers of university and community college graduates. Employers will find the information of assistance in planning recruitment programs since the tables show the location and number of graduates by discipline of study and degree level.

Manpower counsellors and educators may find the data useful in planning the production and utilization of highly qualified manpower. This could influence hiring policies, and the designing and development of educational facilities.

The tables present information on those students located at or near the main campus of the university or college, including students at affiliated universities or colleges at or near the main campus (e. g. the University of Sudbury is included with Laurentian University). Students at other locations are not included with the main listing, but if there are a significant number at another campus there may be a separate listing such as the listing for the University of Saskatchewan campus in Regina.

The totals compiled are estimates of the size of the graduating classes for all of Canada. They are not limited to the total of the figures listed for the individual universities and colleges, but include an allowance for the institutions not listed. In the disciplines where there is insufficient information no estimated total figure has been inserted.

It should be noted that this publication does not claim to contain completely accurate statistical information on higher education graduates in Canada. It simply attempts to estimate as accurately as possible the approximate number and location of those students graduating by discipline of study and institution, and the average starting rates of new graduates.

UNIVERSITIES

Graduations

A few of the more significant fields of study have been singled out in Figure I for purposes of comparison. These discipline groupings are Engineering, pass and general Arts, pass and general Science, honours Arts and Science, and Commerce.

The number of bachelor graduates in Engineering, for example, has increased from 2,412 in 1961 to approximately 3,200 in 1969 and is expected to increase to about 3,900 in 1970. Arts graduates with pass and general bachelor degrees have increased approximately 228% over the same ten year period, while pass and general Science graduates have increased by approximately 241%. In 1970 graduates in pass and general Arts are expected to increase to approximately 26,000, an increase of about 1,000 over 1969. Pass and general Science graduates are expected to increase to approximately 6,000 in 1970. Graduates in honours Arts and Science which have increased from 2,501 in 1965 to approximately 5,680 in 1969 are expected to increase to about 7,100 in 1970. Finally, bachelor pass and honours graduates in Commerce have increased from 1,110 in 1961 to approximately 2,510 in 1969, an increase of 126%. In 1970 pass and honours Commerce graduates are expected to increase to approximately 3,100.

Total graduations in all faculties at the first degree level have increased over the same period from 20,240 to approximately 58,000, an increase of about 187%. In 1970 it is expected that there will be approximately 65,000 students graduating at the first degree level.

Figure II compares the growth rate in graduations at the first degree level with the growth rates of graduations at the Master's and Doctor's degree levels. It is clear that the growth in the number of degrees awarded is greater for higher degrees than it is for first degrees. Figure III compares enrolment trends. It is evident that the higher growth rate of graduate degrees, compared with first degrees, will continue for at least the next two or three years since these future graduates are already enrolled in their courses of study.

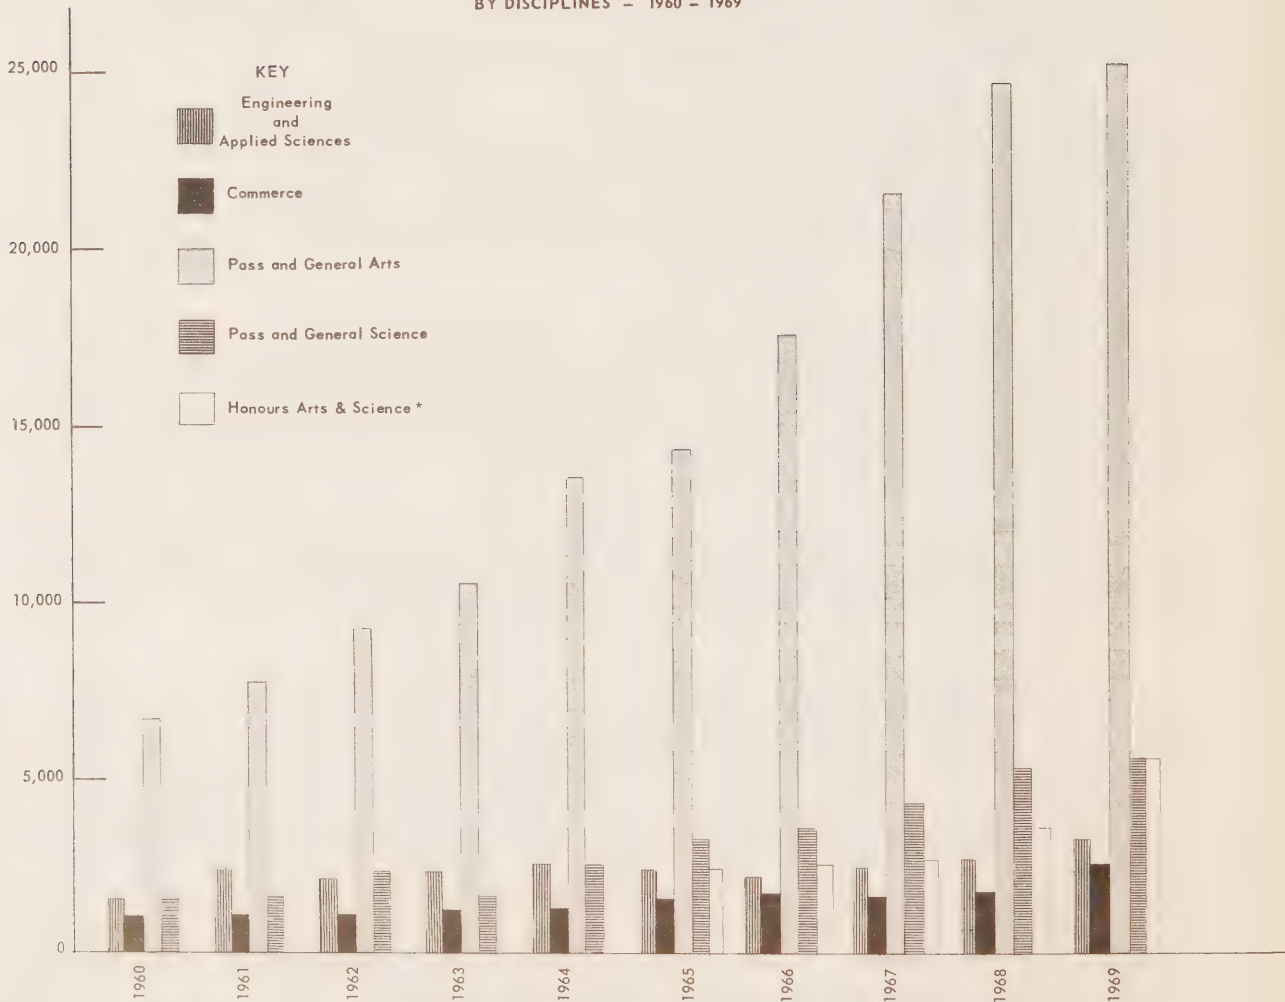

When using those portions of the tables, Figure VII, dealing with graduates in the professions it should be noted that the training offered by Canadian universities is normally designed to meet generally accepted qualifications throughout Canada. However, requirements for practice may vary from province to province and this may influence the kind of training offered at the universities. This is particularly noticeable in Law since the province of Quebec uses the Napoleonic or Civil Code.

The majority of Canadian universities offering training in Law award degrees in Common Law. The universities which offer training and degrees in Civil Law are: The University of Ottawa, McGill University, Laval University, the University of Sherbrooke and the University of Montreal. Two of these universities - Ottawa and McGill - offer both Common and Civil law degrees.

When discussing the professions it should be kept in mind that the percentage increase in graduations has shown tendencies of more limited growth than in the case of the above mentioned discipline groupings. For example, graduations in Dentistry at the bachelor level have increased from 229 in 1962 to approximately 310 in 1969, while the number of graduates in 1970 are expected to be slightly lower than the 1969 figure. Graduations in Pharmacy, while growing from 281 in 1961 to 406 in 1968 are expected to decrease substantially in 1969 and in 1970. Graduations in Medicine which increased from 846 in 1961 to 1,002 in 1968 are expected to increase to approximately 1,100 in 1969 and 1,200 in 1970. Graduations in Law, on the other hand, have had a relatively sharp increase from 661 in 1961 to 1,190 in 1968. In 1969 and 1970 the anticipated increase in Law, in comparison to the 1961 - 1968 growth, is expected to be small. Graduations in Library Science have followed a trend of consistent growth, increasing from 268 in 1961 to 369 in 1968 and about 480 in 1969.

Average Starting Salaries

This information was obtained from a survey of national employers and from Canada Manpower Centre Placement and Career Planning officers at university and college campuses.

The starting salary rates which are presented in the tables are averages. Individual graduates frequently receive significantly different salaries than those listed in this publication. These differences may be due to such factors as the geographic location of employment, the employer's business and employment policy, or the graduate's suitability for employment in a specific field.

Figure IV presents starting salary data at the Bachelor level since 1961 for a number of selected disciplines where information is available. The average starting salary rates for university students graduating in 1969 are estimates drawn from a survey conducted in March 1969 before students actually graduated. The data for the preceding years are the actual starting salary rates reported after graduation and commencement of employment.

Starting salaries for "All Graduates" in Honours Arts, as shown in Figure V, indicate a higher rate than for each of the disciplines listed separately under Honours Arts. The reason for this is that many employers of large numbers of university graduates have one starting salary for graduates at each degree level in a faculty, and do not pay according to discipline of study. Employers not paying according to discipline had higher starting salaries for Honours Arts graduates in 1969 than did those employers who did pay according to discipline.

Starting salary rates for those obtaining pass and honours bachelor degrees are given for Arts, Science and Commerce.

The 1969 data presented in Figure V, show increases over rates for those graduates of 1968. The increases are significant in almost every discipline of study. However, the increases between 1968 and 1969 appear to be less than the increases between 1967 and 1968. Nevertheless, graduates in certain disciplines, such as Nursing, Library, Sciences and Social Work received substantially higher starting salaries in 1969 than in 1968.

University Course Offerings

The tables making up Figure IX contain the main course offerings at Canadian universities. However, many specializations are not shown. Furthermore, no differentiation has been made between general, major and honours degrees at the bachelor's level, nor between graduate and undergraduate diploma courses.

The tables have been verified by university registrars, and should be complete for the disciplines listed for the 1969-70 academic year. Additional information can be obtained from the calendar or the Registrar of the university concerned.

All the major universities in Canada are included in the table. While no attempt has been made to list separately constituent or junior affiliated colleges, their course offerings are generally included opposite the principal institution. Universities included in the course offering tables are listed in the appendix.

COMMUNITY COLLEGES

In this publication the term "Community College" includes institutes of technology, colleges of applied arts and technology, junior and regional colleges and institutes of trades and vocational centres as well as the Quebec CEGEPs (college d'enseignement general et professionnel).

Over the past few years these institutions have come to have a direct influence on Canadian higher education. Although they are designed to meet the need for post-secondary education they do not attempt to provide a full university education. These colleges occupy a middle position between the secondary school and the university. At many of these institutions there is a growing tendency to offer two-year on-going courses in addition to other courses which lead directly to employment. Some of the community colleges provide courses acceptable to universities and colleges for degree credit.

Graduations

The community colleges have been increasing in number, range of courses, enrolments and graduating classes. The disciplines as detailed in Figure VIII which have shown the most significant increases in graduations between 1968 and 1969 are Business Administration, Secretarial Science, Social Service and most of the technologies, such as, Computer Science, Control Systems, Mechanical, Metallurgical, Electrical, Electronics and Surveying. So far there is no indication that there is, or likely to be, a significant decrease in enrolment in any of the disciplines offered at the community colleges. It is also important to note that in certain fields of study community college graduates increasingly compete with new university graduates in the labour market.

Average Starting Salaries

Average starting salaries for community college graduates this year show an increase over the rates offered in 1968. This is true for almost every discipline of study. Salaries for graduates in some disciplines have substantial higher increases than the increases for some other disciplines. The disciplines which show the most substantial salary increases are Business Administration, Accounting, Finance, Computer programming, Industrial Management, and Marketing and Retailing. In the technological area the fields of study with the highest salary increases are Aeronautical, Agricultural, Forestry, Instrumentation and Control Systems.

The rates in Figure VI are derived from a survey of employers of community college graduates as well as from placement and career planning officers at community colleges throughout Canada. The salaries reported represent the national averages and are therefore subject to variations due to the employment policies of the different employers across Canada.

Community College Course Offerings

Figure X is made up of tables showing community college course offerings by discipline and by institution. The tables have been verified by community college registrars. However, community colleges are developing rapidly and there will undoubtedly be additional course offerings in the 1969-70 academic year, which are not shown in the tables. Additional information can be obtained from the calendar or the Registrar of the community college concerned. Community Colleges and related institutions included in the course offering tables are listed in the appendix.

University Course Offerings

The following tables contain the main course offerings at Canadian universities. They are principally designed to correspond to the contents of this book, and hence are incomplete in certain respects.

Specializations within Agriculture are not shown; most medical specializations are not shown; a wide variety of language courses have been included in "Modern Languages", and many biological specialties have not been singled out. Certain other courses of a unique nature are not included.

As explained in the legend, the following figures are used:

1. indicates that the institution offers a bachelors degree;
2. indicates that the institution offers both a bachelors and a masters degree;
3. indicates that the institution offers a bachelors, masters and doctorate degree;
4. indicates that the institution offers a masters and a doctorate.

DIP. indicates that the institution offers a diploma course.

No differentiation has been made between general, major and honours degrees at the bachelors level, nor between graduate and undergraduate diploma courses. The tables have been verified by university Registrars, and should be complete for the disciplines listed for the 1969-70 academic year. Additional information can be obtained from the calendar of the Registrar of the university concerned.

All the major universities in Canada are included in the table. While no attempt has been made to list separately constituent or junior affiliated colleges, their course offerings are generally included opposite the principal institution.

UNIVERSITY COURSE OFFERINGS ATLANTIC PROVINCES — QUEBEC

- 1 — Bachelors Degree
2 — Bachelors and Masters
3 — Bachelors, Masters and Doctorate
4 — Masters and Doctorate
M — Masters only

List of Universities in Tables

The following is not a complete list of universities in Canada. Only those listed in the course tables are included. This list is presented so that the universities abbreviated in the tables can be identified and located.

| | |
|---------------------------------------|-----------------------|
| Memorial University of Newfoundland | St. John's, Nfld. |
| St. Dunstan's University | Charlottetown, P.E.I. |
| Prince of Wales College | Charlottetown, P.E.I. |
| Acadia University | Wolfville, N.S. |
| Dalhousie University | Halifax, N.S. |
| Mount Saint Vincent University | Halifax, N.S. |
| Nova Scotia Technical College | Halifax, N.S. |
| St. Francis Xavier University | Antigonish, N.S. |
| St. Mary's University | Halifax, N.S. |
| Mount Allison University | Sackville, N.B. |
| Université de Moncton | Moncton, N.B. |
| University of New Brunswick | Fredericton, N.B. |
| Bishop's University | Lennoxville, Que. |
| Collège Militaire Royal de Saint-Jean | Saint-Jean, Que. |
| McGill University | Montreal, Que. |
| Sir George Williams University | Montreal, Que. |
| Université Laval | Quebec, Que. |
| Université de Montréal | Montreal, Que. |
| Collège Jean-de-Brébeuf | Montreal, Que. |
| Collège Sainte-Marie | Montreal, Que. |
| Loyola of Montreal | Montreal, Que. |
| Marianopolis College | Montreal, Que. |
| Université de Sherbrooke | Sherbrooke, Que. |
| Brock University | St. Catharines, Ont. |
| Carleton University | Ottawa, Ont. |
| Lakehead University | Port Arthur, Ont. |
| Laurentian University | Sudbury, Ont. |

McMaster University
Queen's University
Royal Military College
Trent University
University of Guelph
University of Ottawa
University of Toronto
University of Waterloo

Waterloo, Ont.
Toronto, Ont.

Brandon, Man.
Winnipeg, Man.
Winnipeg, Man.

Regina, Sask.
Saskatoon, Sask.

Edmonton, Alta.
Calgary, Alta.
Lethbridge, Alta.

Nelson, B.C.
Burnaby, B.C.
Vancouver, B.C.
Victoria, B.C.

Community College Course Offerings

This table shows community college course offerings by discipline and by institution. The list of courses was supplied by the registrars of the institutions concerned.

The list of institutions is intended to be complete for the 1969-70 term. Additional colleges may be open by September, 1970. Names of institutions have been abbreviated on the chart but the names are presented in full in a list which follows it.

The numbers on the chart, and in the footnotes following reference to courses, indicate the length of the course in years. The symbol # stands for both a two- and three-year course.

The chart is divided into four parts — Atlantic Provinces and Quebec, Quebec and Ontario, Ontario and Western provinces combined.

COMMUNITY COLLEGE COURSE OFFERINGS
ATLANTIC PROVINCES AND QUEBEC

Legend:

- 1—indicates 1-year course
- 2—indicates 2-year course
- 3—indicates 3-year course
- #—indicates 2 and 3-year course
- 4—indicates 4-year course

Community Colleges and Related Institutions

The following is not a complete list of community colleges in Canada but only of those included in the course tables of this book. The purpose of this list is to enable the reader to identify and locate these community colleges.

| | | Abbreviations used in preceding chart |
|--|-------------------------------|--|
| Newfoundland & Labrador | | |
| College of Trades & Technology | St. John's, Nfld. | C.O.T.T. |
| College of Fisheries, Navigation, Marine Engineering & Electronics | St. John's, Nfld. | C.F.N.M.E.E. |
| Nova Scotia Eastern Institute of Technology | Sydney, N.S. | N.S.E.I.T. |
| Nova Scotia Institute of Technology | Halifax, N.S. | N.S.I.T. |
| Nova Scotia Land Survey Institute | Lawrencetown, N.S. | N.S.L.S.I. |
| Nova Scotia Agricultural College | Truro, N.S. | N.S.A.C. |
| Nova Scotia College of Art | Halifax, N.S. | N.S.C.O.A. |
| Nova Scotia Marine Engineering School | Halifax, N.S. | |
| New Brunswick Institute of Technology | Moncton, N.B. | N.B.I.T. |
| Saint John Institute of Technology | Saint John, N.B. | S.J.I.T. |
| Dawson College | Montreal, Qué. | Dawson |
| Collège d'Enseignement Général et Professionnel d'Ahuntsic | Montréal, Qué. | Ahuntsic |
| Collège d'Enseignement Général et Professionnel de Bois-de-Boulogne | Montréal, Qué. | Bois-de-Boulogne |
| Collège d'Enseignement Général et Professionnel de Chicoutimi | Chicoutimi, Qué. | Chicoutimi |
| Collège d'Enseignement Général et Professionnel d'Edouard-Montpetit | Cité Jacques-Cartier, Qué. | Edouard-Montpetit |
| Collège d'Enseignement Général et Professionnel de Gaspé | Gaspé, Qué. | Gaspésie |
| Collège d'Enseignement Général et Professionnel de Hull | Hull, Qué. | Hull |

| | | |
|---|--|--------------------------|
| Collège d'Enseignement Général et Professionnel de Joliette | Joliette, Qué. | Joliette |
| Collège d'Enseignement Général et Professionnel de Jonquière | Jonquière, Qué. | Jonquière |
| Collège d'Enseignement Général et Professionnel de Limoilou | Québec, Qué. | Limoilou |
| Collège d'Enseignement Général et Professionnel de Lionel-Groulx | Sainte-Thérèse-de-Blainville, Qué. | Lionel-Groulx |
| Collège d'Enseignement Général et Professionnel de Maisonneuve | Montréal, Qué. | Maisonneuve |
| Collège d'Enseignement Général et Professionnel de Rimouski | Rimouski, Qué. | Rimouski |
| Collège d'Enseignement Général et Professionnel de Rosemont | Montréal, Qué. | Rosemont |
| Collège d'Enseignement Général et Professionnel de Rouyn-Noranda | Rouyn-Noranda, Qué. | Rouyn-Noranda |
| Collège d'Enseignement Général et Professionnel de Sainte-Foy | Sainte-Foy, Qué. | Sainte-Foy |
| Collège d'Enseignement Général et Professionnel de Sainte-Hyacinthe | Sainte-Hyacinthe, Qué. | Sainte-Hyacinthe |
| Collège d'Enseignement Général et Professionnel de Saint-Jean | Saint-Jean, Qué. | Saint-Jean |
| Collège d'Enseignement Général et Professionnel de St-Laurent | Montréal, Qué. | Saint-Laurent |
| Collège d'Enseignement Général et Professionnel de Salaberry-de-Valleyfield | Salaberry-de-Valleyfield, Qué. | Salaberry-de-Valleyfield |
| Collège d'Enseignement Général et Professionnel de Shawinigan | Shawinigan, Qué. | Shawinigan |
| Collège d'Enseignement Général et Professionnel de Sherbrooke | Sherbrooke, Qué. | Sherbrooke |
| Collège d'Enseignement Général et Professionnel de Trois-Rivières | Trois-Rivières, Qué. | Trois-Rivières |
| Collège d'Enseignement Général et Professionnel du Vieux-Montréal | Montréal, Qué. | Vieux-Montréal |
| Institut de Technologie de Lauzon | Lauzon, Qué. | Lauzon Tech. |
| Institut de Technologie de Vaudreuil | Vaudreuil, Qué. | Vaudreuil Tech. |
| Institut de Technologie de Tracy | Tracy, Qué. | Tracy Tech. |
| Institut des Arts Appliqués | Montréal, Qué. | Mont. Applied Arts |
| Institut des Arts Graphiques | Montréal, Qué. | Mont. Graphic Arts |
| Institut de Technologie Maritime du Québec | Québec, Qué. | Quebec Maritime Tech. |
| Ecole des Beaux-Arts | Montréal, Qué. | |
| Algonquin College of Applied Arts and Technology | Ottawa, Ont. | Algonquin |
| Cambrian College of Applied Arts and Technology | North Bay, Sudbury, & Sault Ste. Marie, Ont. | Cambrian |
| Centennial College of Applied Arts and Technology | Scarborough, Ont. | Centennial |

| | | |
|---|---|---------------------|
| Conestoga College of Applied Arts and Technology | Kitchener, Ont. | Conestoga |
| Confederation College of Applied Arts and Technology | Fort William, Ont. | Confederation |
| Durham College of Applied Arts and Technology | Oshawa, Ont. | Durham |
| Fanshawe College of Applied Arts and Technology | London, Ont. | Fanshawe |
| George Brown College of Applied Arts and Technology | Toronto, Ont. | George Brown |
| Georgian College of Applied Arts and Technology | Barrie, Ont. | Georgian |
| Humber College of Applied Arts and Technology | Toronto (Etobicoke) Ont. | Humber |
| Lambton College of Applied Arts and Technology | Sarnia, Ont. | Lambton |
| Loyalist College of Applied Arts and Technology | Belleville, Ont. | Loyalist |
| Mohawk College of Applied Arts and Technology | Hamilton, Ont. | Mohawk |
| Niagara College of Applied Arts and Technology | Welland, Ont. | Niagara |
| Northern College of Applied Arts and Technology | Timmins, South Porcupine, Kirkland Lake, & Haileybury, Ont. | Northern Ryerson |
| Ryerson Polytechnical Institute | Toronto, Ont. | |
| St. Clair College of Applied Arts and Technology | Windsor, Ont. | St. Clair |
| St. Lawrence College of Applied Arts and Technology | Kingston & Cornwall, Ont. | St. Lawrence |
| Seneca College of Applied Arts and Technology | Willowdale, Ont. | Seneca |
| Sheridan College of Applied Arts and Technology | Brampton, Ont. | Sheridan |
| Sir Sandford Fleming College of Applied Arts and Technology | Peterborough, Ont. | Sir S. Fleming |
| Ontario College of Art | Toronto, Ont. | O.C.A. |
| Lakehead University (Technology Division) | Port Arthur, Ont. | Lakehead |
| Centralia College of Agricultural Technology | Huron Park, Ont. | Centralia |
| Kemptville College of Agricultural Technology | Kemptville, Ont. | Kemptville Agric. |
| Ridgetown College of Agricultural Technology | Ridgetown, Ont. | Ridgetown Agric. |
| Niagara Parks Commission School of Horticulture | Niagara Falls, Ont. | |

Liste des établissements

La liste qui suit n'est pas complète mais ne comprend que les établissements inclus dans le tableau des cours offerts par les collèges et les CEGEP. Le but de cette liste est de permettre aux lecteurs d'identifier et de situer ces collèges et CEGEP.

| | | |
|---|-------------------------------|-------------------|
| Collèges des métiers et de technologie de Terre-Neuve et du Labrador | St-Jean, Terre-Neuve | C.O.T.T. |
| Collège des pêcheries, de navigation, de génie maritime et d'électronique | St-Jean, Terre-Neuve | C.F.N.M.E.E. |
| Institut de technologie de l'est de la Nouvelle-Ecosse | Sydney, Nouvelle-Ecosse | N.S.E.I.T. |
| Institut de technologie de la Nouvelle-Ecosse | Halifax, Nouvelle-Ecosse | N.S.I.T. |
| Institut d'arpentage de la Nouvelle-Ecosse | Lawrencetown, Nouvelle-Ecosse | N.S.L.S.I. |
| Collège d'agriculture de la Nouvelle-Ecosse | Truro, Nouvelle-Ecosse | N.S.A.C. |
| Collège des arts de la Nouvelle-Ecosse | Halifax, Nouvelle-Ecosse | N.S.C.O.A. |
| Ecole de génie maritime de la Nouvelle-Ecosse | Halifax, Nouvelle-Ecosse | |
| Institut de technologie du Nouveau-Brunswick | Moncton, Nouveau-Brunswick | N.B.I.T. |
| Institut de technologie de St-Jean | St-Jean, Nouveau-Brunswick | S.J.I.T. |
| Collège d'enseignement général et professionnel Dawson | Montréal, Québec | Dawson |
| Collège d'enseignement général et professionnel Ahuntsic | Montréal, Québec | Ahuntsic |
| Collège d'enseignement général et professionnel Bois-de-Boulogne | Montréal, Québec | Bois-de-Boulogne |
| Collège d'enseignement général et professionnel de Chicoutimi | Chicoutimi, Québec | Chicoutimi |
| Collège d'enseignement général et professionnel Edouard Montpetit | Cité Jacques-Cartier, Québec | Edouard Montpetit |

**COURS OFFERTS PAR LES COLLÈGES
PROVINCES DE L'OUEST**

| | 1 – cours d'un an | 2 – cours de deux ans | 3 – cours de trois ans | 4 – cours de quatre ans |
|---|-------------------|-----------------------|------------------------|-------------------------|
| Technologie chimique | 2 | | | |
| Technologie de la construction | 2 | | | |
| Technologie de l'énergie électrique | 2 | | | |
| Technologie mécanique | 2 | | | |
| Technologie de la métallurgie | 2 | | | |
| Technologie de la production et de la gestion industrielle | 2 | | | |

(a) Aussi offert à l'école des Beaux-Arts
(b) Comprend les options distribution et production

Cours offerts par les collèges et les CEGEP

Les registraires des collèges et CEGEP nous ont fourni leur programme d'études. Le tableau indique les disciplines offertes par chacun de ces établissements.

On y énumère tous les établissements qui offraient des cours lors de l'année académique 1969-70. Quelques nouvelles écoles ouvriront peut-être leurs portes en septembre 1970. Les noms des établissements ont été abrégés dans le tableau, mais la liste qui suit énumère toutes les écoles supérieures non-universitaires en indiquant leur nom complet.

Les nombres dans le tableau et les notes au bas des pages indiquent la durée des cours. Le symbole # indique soit un cours de deux ans, soit un cours de trois ans.

Le tableau est divisé en quatre parties: Provinces Atlantiques et Québec, Québec et Ontario, Ontario, et Provinces de l'Ouest.

La présente liste est incomplète: elle ne contient pas tous les noms des universités canadiennes, mais seulement ceux qui sont consignés dans les tableaux. Elle permet d'identifier et de situer les universités dont les noms sont abrégés dans les tableaux.

Memorial University of Newfoundland St-Jean, T.-N.

St. Dunstan's University Prince of Wales College Charlottetown, I.-P.-E. Charlottetown, I.-P.-E.

Acadia University Dalhousie University Mount Saint Vincent University Nova Scotia Technical College St. Francis Xavier University St. Mary's University

* Plus un diplôme

(a) Les 2 premières années au Nova Scotia Agricultural College

(b) Seulement les 3 premières années

(c) Seulement les 2 premières années en collaboration avec U.N.B.

(d) Seulement les 2 premières années

Cours offerts dans les Universités

Les tableaux qui suivent contiennent les principaux cours que dispensent les universités canadiennes. Préparés en fonction des besoins de la présente brochure, ils sont nécessairement incomplets.

Les spécialisations touchant l'agriculture ne sont pas mentionnées; de même en est-il de la plupart des spécialisations en médecine. Plusieurs cours de langues ont été introduits dans les "langues modernes". Un grand nombre de branches des sciences biologiques n'ont pas été considérées comme discipline distincte et d'autres cours de nature particulière ont été omis.

Comme l'explique la légende, les indications suivantes sont utilisées:

- 1 La maison d'enseignement offre le baccalauréat.
- 2 La maison d'enseignement offre le baccalauréat et la maîtrise.
- 3 La maison d'enseignement offre le baccalauréat, la maîtrise et le doctorat.
- 4 La maison d'enseignement offre la maîtrise et le doctorat.

Aucune distinction n'a été faite entre le cours général, le cours avec mention et le cours avec spécialisation, ni au niveau du baccalauréat ni au niveau des études supérieures. Les tableaux ont été vérifiés par les secrétaires généraux des universités et devraient être complets pour ce qui est des disciplines considérées pour l'année académique 1969-1970. Pour plus de renseignements, l'intéressé devra consulter les annuaires publiés par chaque université, ou s'adresser au secrétaire général de l'université concernée.

Les tableaux mentionnent toutes les principales universités canadiennes. Cependant, aucune mention n'est faite des écoles constituant ou des collèges affiliés, vu que les cours offerts dans ces maisons d'enseignement sont inscrits vis-à-vis l'institution principale.

TABLEAUX SUPPLEMENTAIRES
NOMBRE DE
DIPLOMES D'UNIVERSITES
COLLEGES ET CEGEP
PAR DISCIPLINE ET ETABLISSEMENT

La figure X est composée de tableaux montrant les cours offerts dans les collèges et CEGEP, par discipline et par institution d'enseignement. Les registraires des collèges et CEGEP ont vérifié ces tableaux. Toutefois, en raison de la croissance rapide des collèges et CEGEP, il y aura sans doute des cours offerts durant l'année académique 1969-1970 qui n'apparaissent pas dans les tableaux. On peut obtenir de plus amples renseignements dans l'annuaire ou auprès du registraire du collège ou du CEGEP concerné. Les collèges et CEGEP compris dans les tableaux des cours offerts apparaissent à l'appendice.

| Technologie mécanique | 470 | 505 |

COLLEGES

On entend ici par collèges, les CEGEP, les instituts de technologie, les collèges d'arts appliqués et de technologie, les écoles de métiers et de formation professionnelle, les "junior colleges" et les "regional colleges".

Au cours des dernières années, ces institutions ont joué un rôle prépondérant dans l'enseignement supérieur au Canada. Elles n'ont pas la prétention de fournir un cours universitaire complet, mais bien de répondre au besoin d'une formation post-secondaire. On peut dire que ces collèges constituent un trait d'union entre l'école secondaire et l'université. On a de plus en plus tendance dans ces institutions d'enseigner à offrir des cours de deux ans qui préparent à l'université, en plus des autres programmes d'études qui mènent les élèves directement à la population active. Certains collèges offrent ou offriront prochainement des cours dont les crédits sont reconnus par les universités. Au Québec, les CEGEP offrent tous un tel cours d'enseignement général.

Nombre de diplômés

Le nombre des collèges, des inscriptions et des diplômés s'est accru, tandis que l'éventail des cours s'est élargi. Le nombre des inscriptions et des diplômés s'est particulièrement accru dans les disciplines suivantes: administration des affaires, sciences du secrétariat, service social, et la plupart des technologies, comme celles de l'informatique, des systèmes de contrôle, de la mécanique, de la métallurgie, de l'énergie électrique, de l'électronique et de l'arpentage. Rien n'indique jusqu'à maintenant qu'il y a ou qu'il y aura une diminution significative du nombre d'inscriptions dans aucune des disciplines offertes dans les collèges. Fait important à souligner, il existe dans certaines disciplines, une concurrence de plus en plus marquée sur le marché du travail entre les diplômés de collège et les nouveaux diplômés d'université.

Traitements initiaux des diplômés de collèges de 1969

Les traitements initiaux des diplômés des collèges ont augmenté cette année par rapport à 1968, et cela dans presque toutes les disciplines. L'augmentation est beaucoup plus élevée dans certaines disciplines que dans d'autres. Voici les disciplines où l'augmentation a été la plus sensible: administration des affaires, comptabilité, finance, informatique, gestion industrielle, commercialisation et technique marchande. Dans le domaine de la technologie, voici les disciplines où l'augmentation des traitements s'est faite le plus sentir: technologie aéronautique, agricole, forestière, des instruments et technologie des systèmes de contrôle.

Les taux qui apparaissent dans les tableaux sont tirés d'un relevé statistique effectué auprès d'employeurs qui embauchent des diplômés de collèges, et d'agents qui s'occupent du placement et de l'organisation de la carrière des étudiants dans les collèges à travers le Canada. Les traitements consignés représentent les moyennes nationales. Ils sont par conséquent sujets à des variations dues aux politiques d'embauche des divers employeurs d'un bout à l'autre du pays.

Les tableaux utilisés pour construire la figure IX contiennent les principaux cours offerts dans les universités canadiennes. Toutefois, plusieurs spécialisations n'y apparaissent pas. De plus, on n'a pas établi de distinction ni entre le baccalauréat général, avec concentration et avec spécialisation, ni entre les cours menant à un premier grade et les cours d'études supérieures.

Les régis­traires des universités ont vérifié les tableaux, et ceux-ci devraient être complets en ce qui concerne les disciplines mentionnées pour l'année académique 1969-1970. On peut obtenir des renseignements additionnels dans les annuaires des universités auprès de leurs secrétaires généraux.

Toutes les principales universités du Canada sont incluses dans le tableau. Bien que nous n'ayons pas tenté d'énumérer séparément tous les collèges affiliés, les cours qui y sont offerts sont généralement indiqués vis-à-vis l'université à laquelle ils sont affiliés. Les universités dont les cours sont inclus dans les tableaux, apparaissent à l'appendice.

environ 1,100 en 1969 et à 1,200 en 1970. D'autre part, le nombre des diplômés en droit a grimpé de 661 en 1961 à 1,190 en 1968. En 1969 et 1970, l'augmentation prévue dans le nombre des diplômés en droit, comparativement à l'augmentation enregistrée entre 1961 et 1968, devrait être légère. Le nombre de diplômés en bibliothéconomie s'est accru à un rythme soutenu, passant de 268 en 1961 à 369 en 1968 et à 480 en 1969.

Traitement initial des nouveaux diplômés d'université

Ces renseignements ont été tirés d'un relevé statistique effectué auprès d'employeurs qui embauchent un grand nombre de diplômés, et d'agents qui s'occupent du placement et de l'organisation de la carrière des étudiants dans les Centres de Main-d'œuvre du Canada situés sur les campus des universités et collèges.

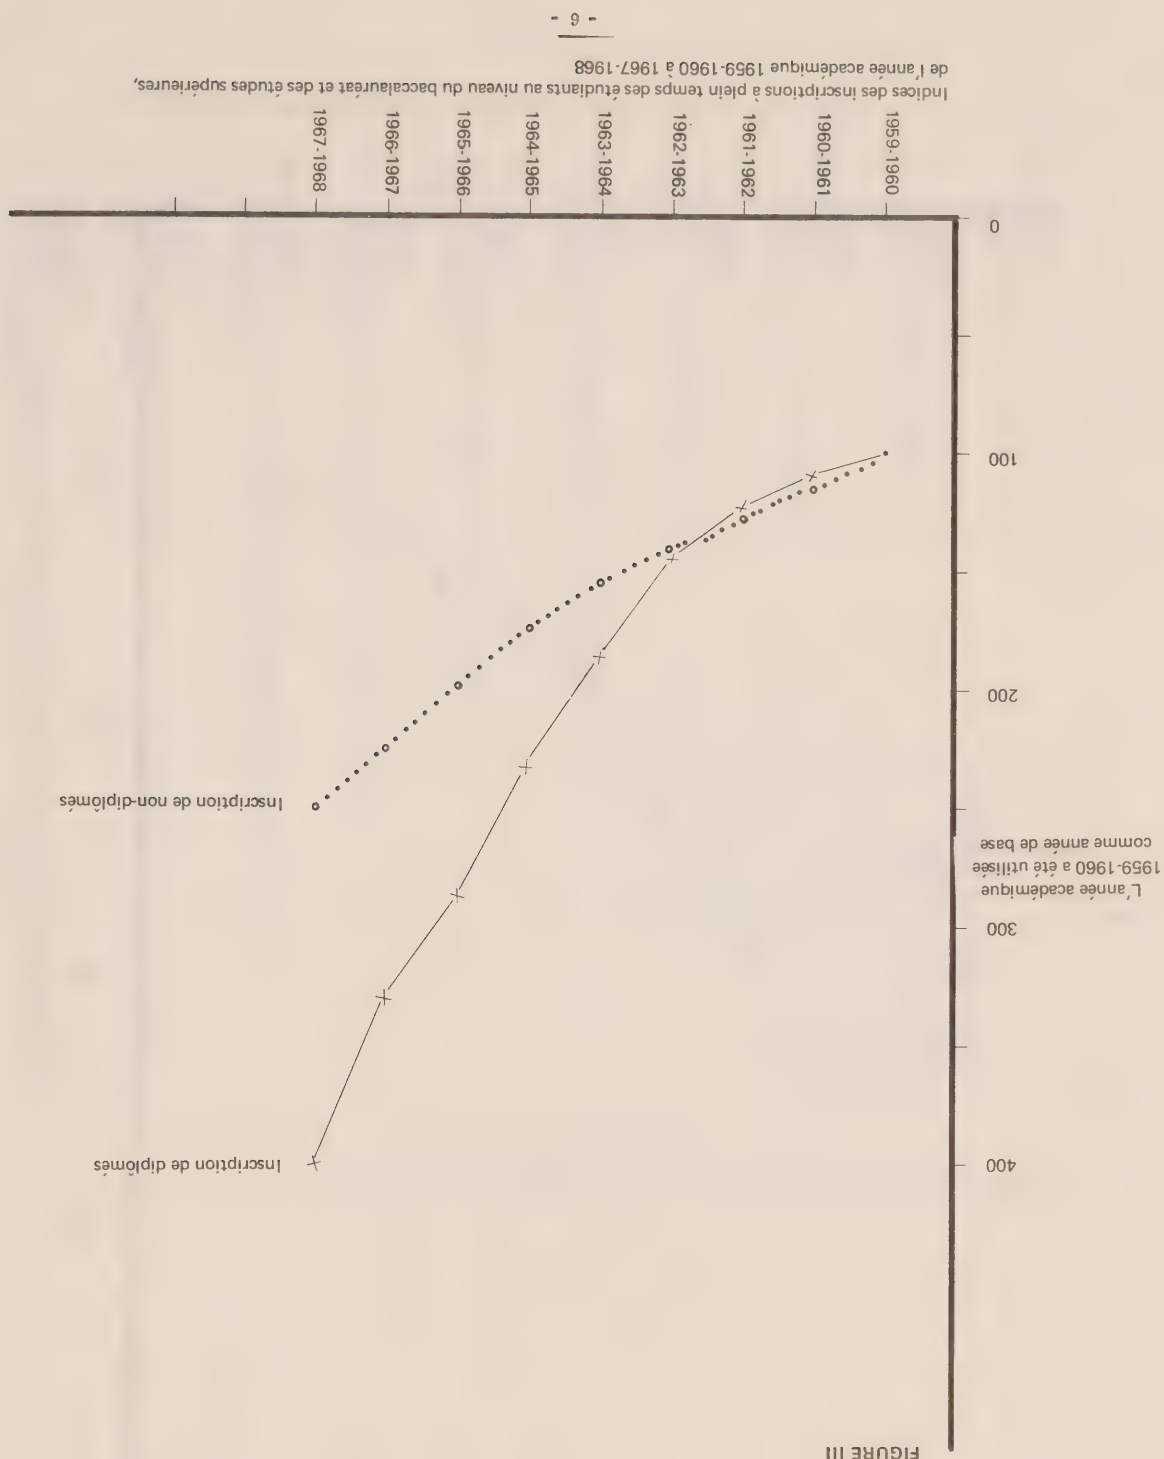

Les taux des traitements initiaux qui apparaissent dans les tableaux ne sont que des moyennes. Il arrive donc souvent que des diplômés reçoivent un traitement très différent de ceux mentionnés dans cette publication, et cela à cause de divers facteurs notamment: la région où il trouve un emploi, le genre d'entreprise et la politique d'embauche de l'employeur, et la préparation du diplômé à occuper la position.

Le taux global des traitements initiaux pour tous les bacheliers en arts avec spécialisation, tel qu'indiqué dans les tableaux, est plus élevé que celui mentionné pour chacune des autres disciplines qui apparaissent séparément sous le titre "Arts - avec spécialisation". Ceci s'explique par le fait que beaucoup d'employeurs qui retiennent les services d'un grand nombre de diplômés d'université offrent un traitement initial selon le grade obtenu dans une faculté, et ne spécifient aucune discipline particulière. Fait à remarquer, les employeurs qui ne spécifient aucune discipline particulière offrent, en 1969, des traitements initiaux plus élevés aux bacheliers en arts avec spécialisation que ceux qui en mentionnaient.

Il est fait mention des taux des traitements initiaux offerts aux titulaires d'un baccalauréat en arts, en sciences ou en commerce avec et sans spécialisation.

La figure III fournit des données sur les traitements initiaux offerts depuis 1961 aux bacheliers d'un groupe de disciplines choisies sur lesquelles nous possédons suffisamment de renseignements. La moyenne des traitements initiaux des diplômés de 1969 n'est qu'une prévision tirée d'un relevé statistique effectué en mars 1969, avant même que les étudiants n'obtiennent leur grade. Les données pour les années précédentes consistent des taux de traitements initiaux reçus par des diplômés après la collation des grades et au début de l'emploi.

Les données de 1969 indiquent que les diplômés de cette année ont bénéficié de taux de traitement supérieurs à ceux des diplômés de 1968. Toutefois, les augmentations enregistrées entre 1968 et 1969 semblent moindres que celles enregistrées entre 1967 et 1968. Néanmoins, des diplômés dans certaines disciplines, comme les sciences infirmières, la bibliothéconomie et le service social, ont touché des traitements initiaux beaucoup élevés en 1969 qu'en 1968.

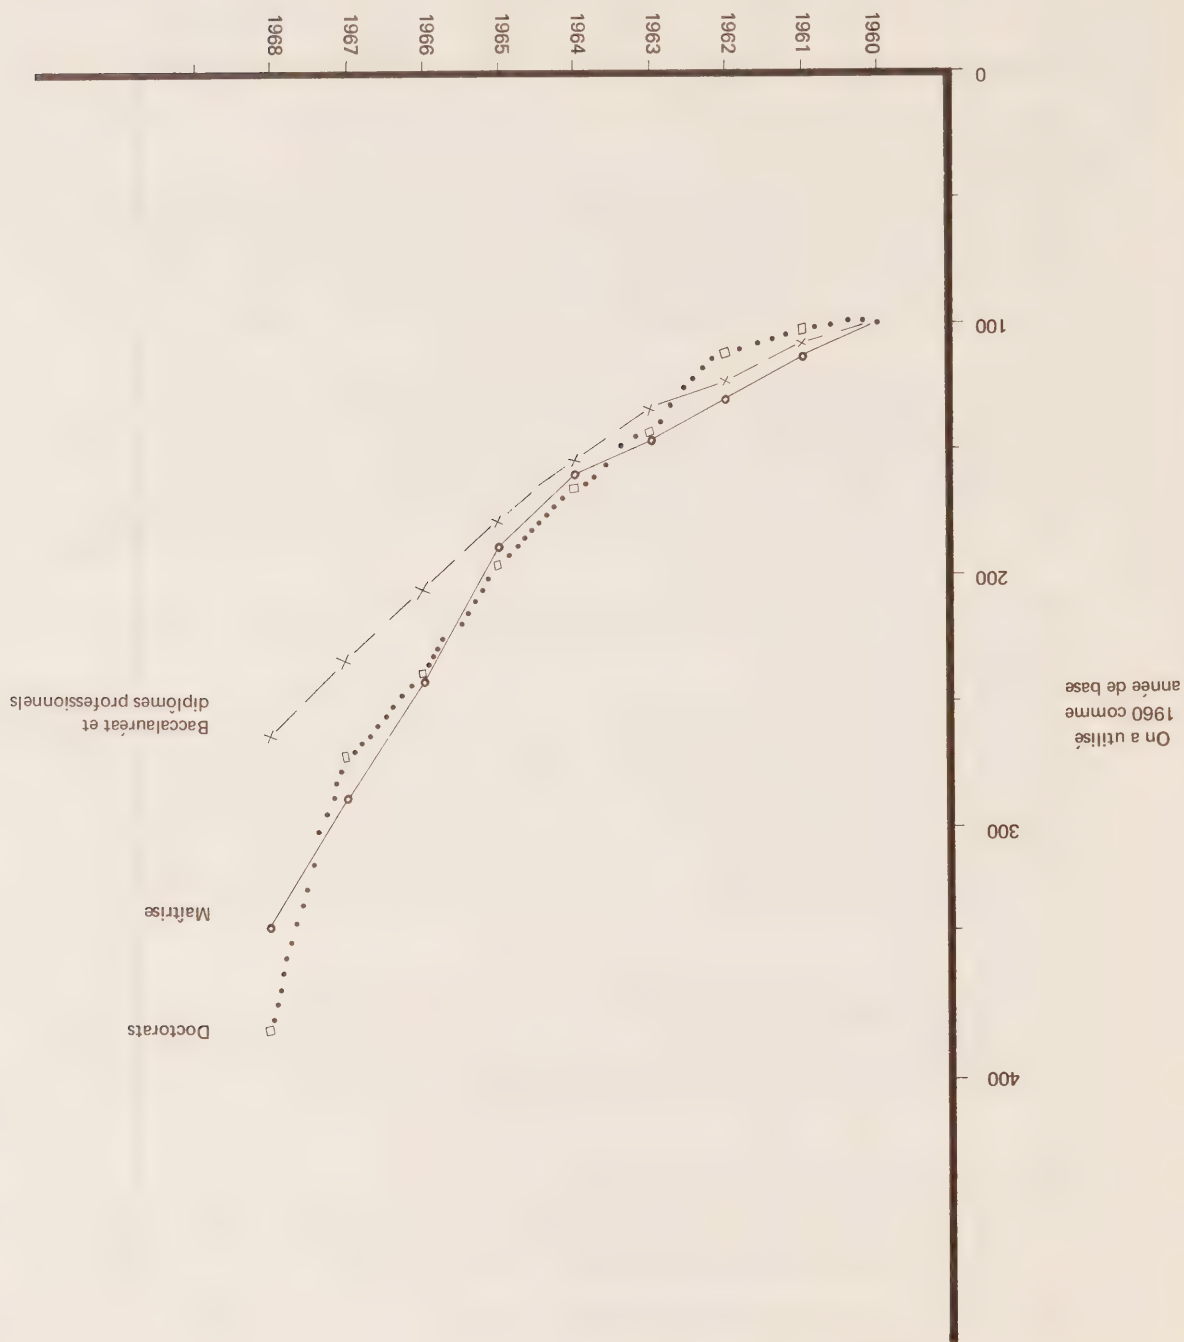

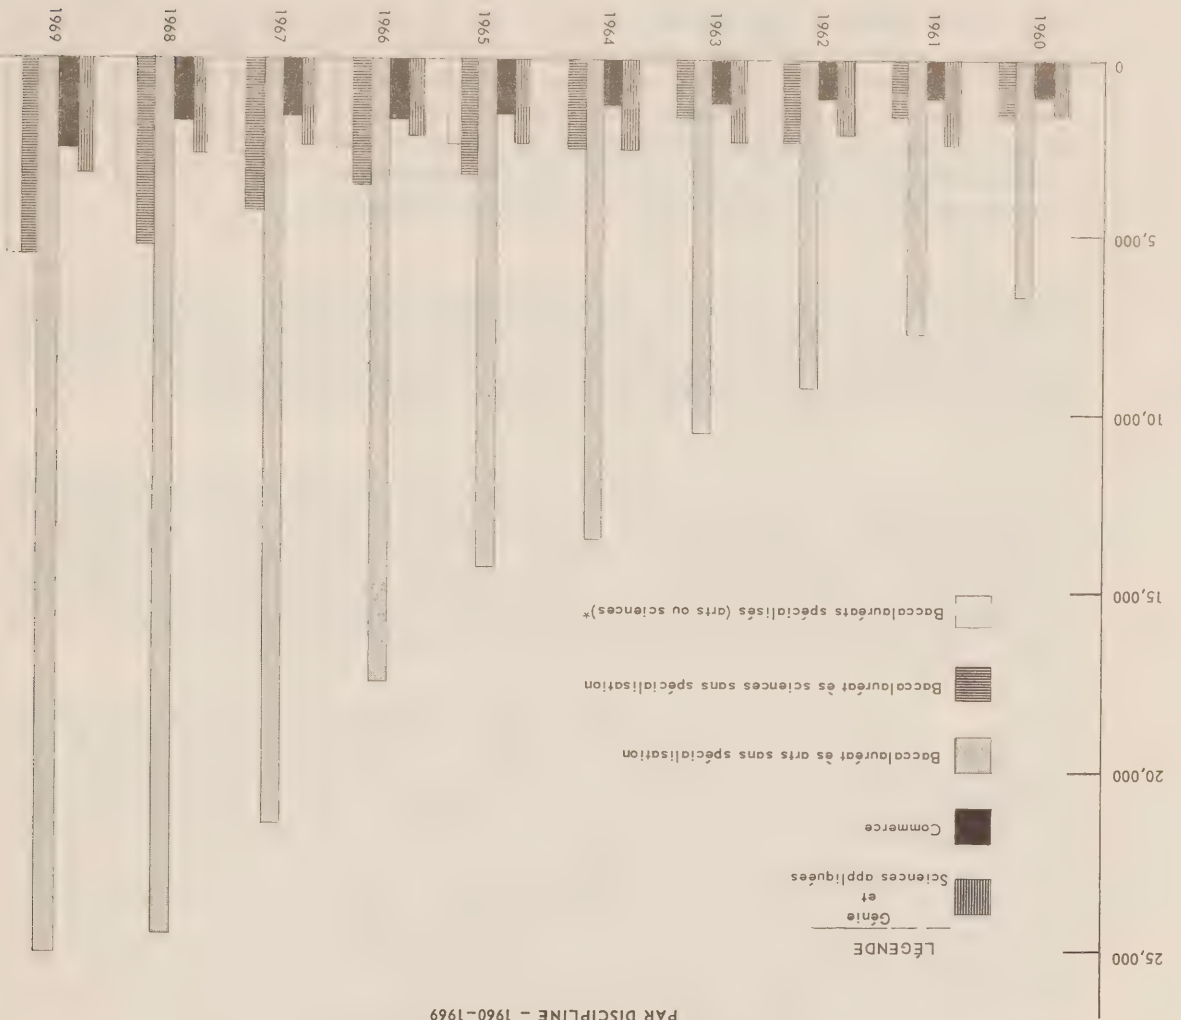

FIGURE II

BACCALAURÉAT ET PREMIER GRADE PROFESSIONNEL
PAR DISCIPLINE - 1960-1969

FIGURE I

* Avant 1965, les titulaires d'un baccalauréat spécialisé sont inclus dans les groupes des baccalauréats sans spécialisation.

Cette publication contient une prévision du nombre total de nouveaux titulaires d'un baccalauréat et d'un premier grade professionnel. Il ne s'agit pas de la somme des chiffres de chaque université et collège, mais de prévisions sur le nombre d'étudiants qui obtiendront un diplôme en 1969 et 1970 dans tout le Canada. Ces prévisions tiennent compte des institutions d'enseignement non mentionnées dans cette brochure. Lorsqu'on ne possédait pas suffisamment de données sur certaines disciplines, on a alors omis de mentionner le nombre total prévu.

Pour fins de comparaison, quelques unes des principales disciplines ont été regroupées dans la figure I. Il s'agit des disciplines suivantes: le génie, les arts (sans spécialisation), les sciences (sans spécialisation), les arts et les sciences (avec spécialisation), et le commerce. Le nombre de la bacheliers en génie, par exemple, est passé de 2,412 en 1961 à environ 3,200 en 1969, et on prévoit atteindre le chiffre de 3,900 en 1970. Le nombre des bacheliers en arts sans spécialisation a augmenté d'environ 228% durant cette même période, tandis que le nombre de diplômés sans spécialisation en science a augmenté d'environ 241%. On prévoit que le nombre de bacheliers en arts sans spécialisation atteindra 26,000 en 1970, une augmentation d'environ 1,000 par rapport à 1969. Le nombre des diplômés sans spécialisation en science devrait atteindre environ 6,000 en 1970. Par ailleurs, le nombre de diplômés avec spécialisation en arts et en science est passé de 2,501 en 1965 à environ 5,680 en 1969, et devrait atteindre environ 7,100 en 1970. Enfin, le nombre de bacheliers avec et sans spécialisation en commerce est passé de 1,110 en 1961 à environ 2,510 en 1969, une augmentation de 126%; on prévoit que leur nombre atteindra 3,100 en 1970. Le nombre total des diplômés au niveau du baccalauréat dans toutes les facultés, comme on le voit à la figure II, est passé au cours de cette période, de 20,240 à environ 58,000, une augmentation d'environ 187%. On prévoit qu'en 1970, le nombre total des diplômés s'élèvera à environ 65,000.

En utilisant les parties des tableaux ayant trait aux diplômés des diverses professions, on devra tenir compte du fait que la formation dispensée dans les universités canadiennes est normalement conçue de façon à satisfaire aux normes reconnues à travers le Canada. Toutefois, les exigences pour pratiquer telle ou telle profession peuvent varier d'une province à l'autre, ce qui influence certes le genre de formation offerte dans les universités. C'est particulièrement vrai en droit, alors que dans la province de Québec on utilise le code Napoléon, ou code civil.

La plupart des universités canadiennes qui offrent le cours de droit accordent des diplômes en droit commun (Common Law). Cinq universités offrent un programme d'études en droit civil. Il s'agit des universités d'Ottawa, McGill, Laval, de Sherbrooke et de Montréal. Deux d'entre elles, - les universités d'Ottawa et McGill, - offrent des cours en droit commun et en droit civil.

Lorsqu'il est question de professions, il faut se rappeler que l'augmentation des diplômés en pourcentage a tendance à être moindre que celle du groupe des disciplines mentionnées ci-dessus. Par exemple, le nombre de bacheliers en art dentaire est passé de 229 en 1962 à environ 310 en 1969, tandis que le nombre prévu de diplômés en 1970 devrait être sensiblement inférieur à celui de 1969. Bien que le nombre des diplômés en pharmacie ait passé de 281 en 1961 à 406 en 1968, il devrait baisser substantiellement en 1969 et en 1970. Le nombre de diplômés en médecine est passé de 846 en 1961 à 1,002 en 1968, et devrait augmenter à

PREFACE

Les renseignements contenus dans cette brochure découlent de relevés statistiques effectués par la section de l'enseignement supérieur du Bureau fédéral de la statistique en décembre 1968. Ces relevés statistiques ont été conçus en vue de satisfaire aux exigences de la section des professions libérales et techniques du ministère de la Main-d'œuvre et de l'Immigration, qui a vu à corriger et à ajouter des renseignements de façon à mettre cette brochure à jour.

Cette publication est destinée aux conseillers en main-d'œuvre, aux éducateurs et aux employeurs de diplômés d'université et de collège. Ces renseignements devraient aider les employeurs à concevoir leurs programmes de recrutement, puisque les tableaux donnent, pour chaque université ou collège, le nombre de diplômés, la discipline et le grade obtenu.

Les conseillers en main-d'œuvre et les éducateurs trouveront certainement ces données très utiles pour ce qui est de la planification et de l'analyse du marché du travail. Elles devraient aider aussi à prévoir le rendement et l'utilisation de la main-d'œuvre hautement spécialisée. Ceci pourrait avoir une influence sur les politiques d'embauche, la création et l'élaboration des installations d'enseignement.

Les chiffres qui apparaissent dans les tableaux tiennent compte des étudiants qui fréquentent des universités et collèges affiliés situés sur le campus principal ou tout près. Par ailleurs, les lecteurs trouveront dans des listes séparées des renseignements sur les diplômés d'universités et collèges affiliés situés loin du campus principal, lorsque le nombre d'étudiants qui fréquentent ces institutions d'enseignement est assez élevé mentionnons, par exemple, le campus de Regina de l'université de la Saskatchewan.

Ce n'est nullement notre prétention de fournir aux lecteurs de cette brochure les données statistiques finales sur les diplômés d'études supérieures au Canada. Nous tentons toutefois de déterminer de la façon la plus précise possible le nombre approximatif de diplômés par discipline et par institution d'enseignement.
